## PART.190 WHAT IS A SEX TOY?

### Historical dates

The oldest artificial penis ( dildo ) was found in 5000-year-old Babylonian ruins.  
During the Edo period of Japan, a specialized shop was opened. In 1968 the electric powered vibrator "the dancing Arabian doll" was brought on the market.

### "Do women have to depend on sex toys?"

Women's organizations in the American state of Alabama sued the government because of a sales prohibition for sex goods like vibrators with the argumentation that it'd be an intrusion into privacy.

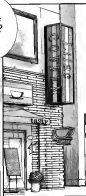

Many psychological advisors recommended women to use such tools in the event of troubles in their sex lives.
